## To Put On Flesh And Increase Weight

A Physician's Advice

Most thin people eat from four to six pounds of good solid fat-making food every day and still do not increase in weight one ounce, while on the other hand many of the plump, chunky folks eat very lightly and keep gaining all the time. It's all bosh to say that this is the nature of the individual. It isn't Naure's way at all.

Thin folks stay thin because their powers of assimilation are diffective. They absorb just enough of the food they eat to maintain life and a semblance of health and strength. Stuffing won't make them gain a single "stay won't make them gain a single stay won't make them and strength. Stuffing elements of their food just stay in the body as waste. What such people need its semething that will prepare these fatty food elements so that their blood can absorb them and deposit them all about the body—something, too, that will multiply their red blood corpuscies and increase their blood's carrying power.

and increase their blood's carrying power.

For such a condition I always recommend eating a Sargol tablet with every meal. Sargol is not, as some believe, a patented drug, but is a scientific combination of six of the most effective and powerful flesh building elements known to chemistry. It is absolutely harmless, yet wonderful, ye flective, and a single tablet eaten with each meal often has the effect of increasing the weight of a thin man or woman from three to live pounds a week. Sargol is sold by Lee & Osgood and other good druggists everywhere on a positive guarantee of weight increase or money back.

RULES FOR PROTECTION

OF MIGRATORY BIRDS Department of Agriculture Amendments Effective Oct. 1.

Washington, June 29.—Amendments to the department of agriculture's reg-ulations for protection of migratory birds, published today, will become ef-fective October 1.

The effect of one of the changes is to permit, on the Missouri and the up-per waters of the Mississippi, the shooting of all migratory game birds for which there is an open season from October 1, 1914, to January 1, 1915. After the latter date the prohibition will be in force again. Other amendments deal principally with the closed season for water fowl in various localities.

The new regulations provide for a closed season in zone No. 1, for all water fowl from December 16 to September 1 next following. Exceptions to the rule prescribe the open season in Massachusetts and Rhode Island between January 1 and October 1; Connecticut and New York between January 16 and October 1.

### Real Wonder-Worker For Wrinkled Faces

Those who have tried all sorts of socalled "wrinkle-removers" in a vain effort to lose those unwelcome traces of
age, illness or worry, can scarcely find
words to express their delight with the
wonderful saxolite formula, once they
have given it a trial. The success of
this method is due not alone to its
marvelous effectiveness— upon the
deepest lines and crowsizet, as well as
upon the very line ones—but also to
its surprisingly quick action and its
entire harmlessness. Its simplicity and
its inexpensiveness are other commendable features, for one needs only
dissolve an ounce of powdered exvolite
in a half pint witch hazel, and bathe
the face in this solution. At once a
remarkable transformation is beheld.

It is not only the effect on wrinkles
and creases that is so noticeable, but
facial contour is remarkably improved
and the face looks much younger. One
should be sure to ask the druggist for
the powdered saxolite. The letion, being so refreshing, is particularly grateful to tired faces rasse warm, depressing days

CIVILIAN SUPERVISION

OF SALEM SOON No Further Need for Militia Except for Actual Guard Duty.

Salem, Mass., June 29.—An insur-ance clearing house for the adjustment of all claims growing out of last Thursday's fire is to be established here at once, according to an agree-ment reached today at a meeting of the adjusters of the companies con-cerned. By this plan it is expected that all policies will be systematically and payments made as

promptly as possible.

The action of the adjusters was taken after an announcement from John A. Cabeen, president of the Board of Trade that speculators had been at work among the holders of policies and trying to buy up their claims by representing that adjustments with the companies would be long delayed. Mr. Cabeen said he was informed that some policy holders had already sold their claims on a basis of fifty per cent. The speculators, he said, were well supplied with cash. In some in-stances policy holders had been told that it would be at least a year before they could hope to settle with the com-panies because of the great number of

claims involved.

The statement of Mr. Cabeen was not discussed at the adjusters' meeting, but one of the speakers in urging the need of systematic co-operation, declared that chicanery had been practiced already.

The address was from the Lord's prayer, Thy Kingdom Come, Thy Will Be Done. The meaning of the kingdom of God having been made clear, he said Christ's words, "Behold the kingdom of God is within you," show that Christianity good will, "it has been considered." that Christianity, good will, virtue, Christian love come first in the indi-vidual and through him permeate the church. In the early history of the church it would be said. "See how these Christians love one another." Later the world seeming hopelessit wicked, the thought was to save their own souls by prayer and retirement to monastery and convent.

There was failure of the church to care for the large part of the world upon which Christ placed so much em-phasis. Environment in character building is important, but out of good environment sometimes has come a very bad character. Other organizations than the church make a part stand for the whole. The coming of that kingdom of which Christ speaks so often must be through His church, Hymns precious to the Christian were sung the closing number being Saviour Again to Thy Dear Name, Miss Dorothy McClenathan accompanying on the piano.
